

Minutes of club meeting February 4th 2025

Members attending 33

1. Membership so far - 172
2. Events this year - We offered the Aerobatic organisers 1 day for their event, but they wanted 2 so declined our offer.
3. Proposals for future club nights are: March, members to bring samples of laser cutting. A couple of members will be explaining what can be done & how to do it. April, A talk on Powered glider competition models. May, 3D printing samples & what can be done.
4. RCC questions, - Martin had a few questions printed & Asked the members if they knew the answers (not always as you might think)
5. Club defibrillator - Terry & Dave Carter have been doing some experiments on the feasibility of heating a cabinet to keep the defibrillator above freezing (using a 12 volt leisure battery) over the winter months. As this proved possible, a defibrillator was purchased.
