

Minutes of club meeting August 5th 2025

Members attending 32

1. Membership so far - 191
2. Finances - by the end September we will probably have a loss of about £500.
3. Events - achievement events, Huddersfield on Sun 17th Aug & Pandas 11th Oct, Indoor events start on 11th Oct with 2 per month taking place. 13/14 Sept. is C/L carrier deck event & club scale, although no one has offered to run it yet. At the LMA Elvington show the BMFA will run trial flights (but for BMFA read Pandas)
4. BMFA expects remote I/D to be required this year (maybe), but this is not required on recognised flying sites. It will involve some sort of 'plug in' module.
5. Q & A session:- Public getting in the way then politely tell them. If you have a crash, then take your bits home to dispose & not in the council waste bin. Some C/L flyers allow their models to overfly the RC flightline. This often occurs if the helper/wives sit at the ditch side causing the model to fly further toward the RC flightline. There is a white painted brick positioned at the centre of the circle. Noise problems:- Only concerned if we think it is too noisy & stop flying at 5.00 pm on weekends.
6. A.O.B. - None
